

Title: The anniversary of the buy-button fiasco is an easy story for the MSM and will bring the most mainstream attention to GME in a year.

It makes sense to me that the price is at its lowest since the hearings. The higher the price, the more retarded Citadel looks for being taken down by the internet. The trend is also important. They needed the past month to look so bloody red that anyone newly tuning in would think the stock was toxic. More red= less FOMO. If there was ever an important time to squash GME, this is one of them.
