****The rate of new CS accounts over time : ****

34,000 in October

15,000 in November

17,000 in December

10,000 in January

8000 in February (28 days)

10,000 in March

12,000 in April

10,000 in May

****4000 in June****

#As you can see, our rates of new CS accounts have been highly consistent, until now.

I'm going to keep saying this: My biggest worry about how long it will take to lock the float is that once all apes on Reddit who still have yet to DRS finally do so, the CS account high score will almost completely stop growing. This day is just around the corner! ****Let's face it, with the dividend stock split news, if any current ape did not start to DRS by now, they're not going to.**** Then, our DRS total will only increase by the amount of shares existing DRS apes are adding. Then, instead of our numbers growing by 1.25M per month (based on GameStop's numbers), they will only grow by, optimistically, 750,000 per month (if all of the 150,000 existing CS accounts add 5 shares per month). At this reduced rate, it would take until August 2024 to lock the 35M free float or 5 years to lock the 63M full float! Even IF we continue to DRS 1.25M shares every month from now on, it would still take us until September 2023 to lock the free float, or until August 2025 to DRS the full float.

#This is why these 4 things are CRITICAL!! :

1. ****We need to educate the masses outside of Reddit what DRS is, why they should do it, and why GameStop is an incredible investment****. There are tons of GME holders out there! This is exactly why we started :

****WWW.DRSGME.ORG**** Please share it wherever you can!

2. Apes with money tied up in ****"other investments"**, consider converting those to GME and DRS******. What other investment could possibly compare to GME?!? Even IF others can squeeze, they can't squeeze like GME and only GME has a massive turnaround plan.

"But Miller I don't want all my eggs in one basket. That's why I have other basket stocks." ... Well, the only reason those other basket stocks MIGHT go up is because they're tied to GME, so your eggs are still in one basket (at best)!

3. [DRS your IRA or Roth

IRA](<https://www.drsgme.org/direct-register-shares-from-ira-in-kind-direct-transfer>)

4. Apes with shares in ****Etoro, T212, and Freetrade** : think about selling and re-buying elsewhere!!****** It's

the only way to DRS with them! These 3 brokers will not transfer to another broker nor will they DRS. Why in the heck would you think they have shares?? They simply take your money and place your bet. Please **don't trust your millions to a broker that won't DRS! Seriously, go read their TOS. (Link at bottom)

**If you haven't DRS'd, why not?!?! I don't trust any broker now. I certainly won't trust them not to screw us over with the upcoming dividend stock split or during MOA*S when they're facing insolvency. Make an informed decision, read your broker's TOS!

#Lock the float!!! DRS 100%. Don't give hedgies "one more day"

#Changing the world is what's at stake!!

#TLDR: DRS 100%! Use drsgme.org to educate those outside Reddit.
