With the IMX announcement, I've noticed Gamestop took off their Gamestop token contract from their NFT page. Does this most likely make contract 0x13374200c29C757FDCc72F15Da98fb94f286d71e no longer likely to be used? I was curious if they were going to have a supply of Gamestop tokens to buy after the marketplace launch, but I'm not 100% sure how it would work in theory. Any thoughts?
