Looking at ToS, I see 0 open interest for ALL strike prices. Lemme guess, another "glitch" right? Honestly, I could probably believe that in this case but when looking at the 19Nov21 chain, plenty at the lowest strike and plenty at the highest. And then when we get to 21Jan22 - 135k at the lowest strike and 80k at the highest strike price.

So wtf is going on in December? Anyone else seeing the same 0 OI for ALL strike prices?
