But here is my dilemma: It would cost me over 300\$ to drs 500\$ worth of gme shares and I don't feel like it's a financially sound decision. In any case here is my question, I am fully aware of what might happen if I don't drs, but what will probably happen? Are my dividends truly in danger of not being paid out to me or are probabilities high that all will go smoothly? Thanks for your time and sorry for my ignorance.
