I'm going to keep saying this (updated)

#The rate of new CS accounts over time :

34,000 in October

15,000 in November

17,000 in December

10,000 in January

8000 in February

10,000 in March

12,000 in April

Awesome job!!

According to the trimmed average on computershared.net by u/jonpro03, which was recently proven to be highly accurate, the average shares per CS account is now 80.79 and the CS account high score is 150. **This brings our DRS total to 12,118,500 shares as of Apr. 30/end of Q1.** That's 34.9% of the free float or 19.2% of the whole 63M float! (outstanding minus insiders).

My biggest worry about how long it will take to lock the float is that once all current apes who might DRS, but still haven't, actually finally DRS, the CS account high score will completely stop growing. This day is just around the corner! **Let's face it, with the dividend stock split news, if any current ape is not DRSing in May before the June announcement, they're not going to.** Then, our DRS total will only increase by the amount of shares existing DRS apes are adding plus any new investors. Then, instead of our numbers growing by ~1.23M per month (based on Oct. 30 - Jan. 29 GameStop earnings release dates), they will only grow by, optimistically, 750,000 per month (if all of the 150,000 existing CS accounts add 5 shares per month). At this reduced rate, it would take over 5 years to lock the 63M float!

#This is why these 3 things are CRITICAL!! :

1. **We need to educate the masses outside of Reddit what DRS is, why they should do it, and why GameStop is an incredible investment** This is exactly why we started **www.drsgme.org**! [My Twitter script](<https://twitter.com/Millertime1216a/status/1515480649146241031?s=20&t=gTGyrdRiFRlYQFQZ-m2nOw>)

2. Apes with money tied up in **"other investments", consider converting those to GME and DRS**. What other investment could possibly compare to GME?!? Even IF others can squeeze, they can't squeeze like GME and only GME has a massive turnaround plan.

3. Apes with shares in brokers that will not DRS or transfer to another broker, such as **Etoro, T212, and Freetrade : think about selling and re-buying elsewhere!** It's the only way to DRS with those 3 brokers and keep them from screwing you over. If, LOL, they don't have shares anyway, selling and re-buying hurts nothing! Please **don't trust your millions to a broker that won't DRS! Seriously, go read their TOS. Or check out Etoro's [response](https://www.reddit.com/r/Superstonk/comments/ufsspm/the_other_day_i_contacted_etoro_to_ask_about/?utm_source=share&utm_medium=ios_app&utm_name=iossmf) to this

ape!**

All too often I see others using ~33M as the float, but I'm convinced that is wishful thinking. Existing shares of 76M minus insider shares of 13M = 63M shares that probably need to be DRS'd. Do you really think hedgies can't use NON-DRS shares (institutional, mutual fund, and ETF) to continue their manipulation?!? So, even IF there are actually 250,000 apes on Reddit (or others that somehow know about DRS), and even IF they all DRS, the average number of shares per ape would need to be 252 to lock the 63M. Obviously this will take a much longer time to accomplish. Even IF we continue to DRS 1.23M shares every month from now on, it would still take us until September 2024 to DRS the 63M shares. **Don't give hedgies "one more day" !!**

Get to WORK and spread the word about www.drsgme.org to the masses outside of Reddit and DRS your max! If you haven't DRS'd, why not?!?! I don't trust any broker now. I certainly won't trust them not to screw us over with the upcoming dividend stock split or during MOA*S and/or when they're facing insolvency. Read your broker's TOS.

#Changing the world is what's at stake!!

#LOCK THE FLOAT!!!

#TLDR: DRS your max! Spread the word about drsgme.org
