Hey everyone. Yesterday I tried to post this, but mods took it down cuz i used some verbage about gamestops parteners. I removed that part so lets try this again! Well GME looks like it's about to blast off and I'm absolutely jacked! GME has never looked so bullish

[This is the 1 week](<https://preview.redd.it/jfalocicjmg81.png?width=1772&format=png&auto=webp&s=1f3c0f767bc23a1cd40108debbe11cb5e2608a49>)

GME broke out of the down trend and it looks like its consolidating for a big move up. I dare to say, Parabolic.

MACD (purple circlce) is showing green again and looks like GME will Continue to go up

Stochastics (pink) is flatlining

accumulation distrubrtion is flatlinling (blue)

\-The accumulation/distribution indicator (A/D) is a cumulative indicator that uses [volume](<https://www.investopedia.com/terms/v/volume.asp>) and price to assess whether a stock is being accumulated or distributed. The A/D measure seeks to identify [divergences](<https://www.investopedia.com/terms/d/divergence.asp>) between the stock price and the volume flow. This provides insight into how strong a trend is. If the price is rising but the indicator is falling, then it suggests that buying or accumulation volume may not be enough to support the price rise and a price decline could be forthcoming.

Aroon indication (orange) is also flatlinging

\-The Aroon indicator is a technical indicator that is used to identify trend changes in the price of an asse***, as well as the strength of that trend. In essence, the indicator measures the time between highs and the time between lows over a time period.

GME being this Oversold, and consolidating like this. This to me looks like something big is going to happen.

Also gme finished at 0.00% neither up or down? I might be retarded, but me thinks moon soon

The paroblic SAR flipped (Purple arrow= bullish)

Stochastics (pink arrow) is flatlining

Double bottom on accumalation/distrobution (blue arrow)

Aroon (orange) is also going up

LFG!

TLDR: GME and it's 2 partners are all showing that they are over sold. They are consolidating and showing signs of a reversal. Looks like something big is coming!

TARD: Moon Soon!

Everything is looking primed for lift off!
