

Title: how is the Splividend gonna play our for Public Shorts, Naked Shorts, Fail to delivers, and GME?
Here's some explanation plus perceptive :)

Edit Our is supposed to be Out in the title ■

Here's a full break down of my understanding of the situation

- * It's a Splividend so the public shorts are responsible to buy 3 stocks for every short they borrowed from a lender ■ (that or the lender has to recall so they don't lose 1/4 their value)(either way they buy 3 or they buy 1 ■■■)
- * **[**Update**** short contracts may include splividend clauses meaning they only owe 4 times the shares since value doesn't change theoretically (but it does ■)](https://www.reddit.com/r/Superstonk/comments/vuj4rn/in_context_dlauers_tweets_confirm_to_our_chagrin/?utm_source=share&utm_medium=ios_app&utm_name=iossmf) that means every dollar up cost 4 times the leverage to maintain and every dollar down means more for DRSing■
- * Second there's Fail To Deliver by MMs and Brokers, those Fails means they don't have the stock well now they don't have 4 times the stocks ■■
- * Third there are naked shorts, same as Fails they are multiplied by 4 (both Fails to Deliver and Naked have daily cost to maintain)■■■
- * [Then there's the overall utilized float](https://www.reddit.com/r/GME/comments/vsg8sv/gme_full_float_utilization/?utm_medium=android_app&utm_source=share) (only 7 Million left as of last GME quarter, end of July will dramatically change this ■ so even if the price somehow goes sideways this is still happening at a rapid rate■■)
- * [And the realization there's no where for the price to go](https://www.reddit.com/r/GME/comments/vu0627/seriously_hedgies_r_fuk/?utm_medium=android_app&utm_source=share)
- * [And the further realization of check mate if they pull fuckery publicly.](https://www.reddit.com/r/GME/comments/vtlf2z/i_know_you_dont_have_my_stock_you_better_go_find/?utm_medium=android_app&utm_source=share)
- * Also a PSA the rights to Splividend transfer to the buyer all the way up until the actual issuance of shares. (So yes ■s can just keep on buying all the way through the 22nd ■ "[If you sell your stock before the ex-dividend date, you also are selling away your right to the stock dividend.](<https://www.investor.gov/introduction-investing/investing-basics/glossary/ex-dividend-dates-when-are-you-entitled-stock-and>)"
- * [Lastly an Infograph showing the difference between a splividend and a split](https://www.reddit.com/r/GME/comments/vtqtteh/split_vs_splividend_infograph/?utm_source=share&utm_medium=ios_app&utm_name=iossmf)
- * [Lastly Lasty a mini simulation of how Splividend works](https://www.reddit.com/r/Superstonk/comments/vurops/splividend_smooth_brain_edition_w_pictures_based/?utm_source=share&utm_medium=ios_app&utm_name=iossmf)

No where to go but ■■■■ (or massive amounts of Crime, Leverage and Red days for the general market, then ■ on the rising boat the economies life raft ■■■■■■■■)(oh and I can't forget the market place is also launching this month ■■■■■■)
