No I'm not selling, nor will I until systemic reform or phone number prices.

Whichever comes first.

What I want to know is if there is an updated source that discusses the selling mechanics of Computershare?

I know about the market and limit orders, but when MOASS happens, are there any regulations or processes to worry about?

I saw a dd in the library saying orders above \$1m need to be written in. Is that still true?

Sorry for being a crayon eating ape. Just want to get my ducks in a row.

TL:DR I'm uneducated and want to become a better ape.
