

Title: how is the Splividend gonna play our for Public Shorts, Naked Shorts, Fail to delivers, and GME?

Here's some explanation plus perceptive :)

Edit Our is supposed to be Out in the title ■

Here's a full break down of my understanding of the situation

* It's a Splividend so the public shorts are being Marged by lender asking for their stock back because no lender is sitting there pretty waiting to lose 1/4 of there value for shortie (or shortie is responsible to buy 3 stocks for every short they sold to the market and/or borrowed from a lender ■) (full verification needed for which sernairo is correct, either way shortie is fucked)

* Second there's Fail To Delivers by MMs and Brokers, those Fails means they don't have the stock well now they dont have 4 times the stocks ■■

* Third there are naked shorts, same as Fails they are mutplied by 4 (both Fails to Deliver and Nakeds have daily cost to maintain)

* [Then there's the overall locked up float](https://www.reddit.com/r/GME/comments/vsg8sv/gme_full_float_utilization/?utm_medium=android_app&utm_source=share) (only 7 Million left as of last GME quarter, end of July will dramatically change this ■)

* [And the realization there's no where to go](https://www.reddit.com/r/GME/comments/vu0627/seriously_hedgies_r_fuk/?utm_medium=android_app&utm_source=share)

* [And the further realization of check mate.](https://www.reddit.com/r/GME/comments/vtlf2z/i_know_you_dont_have_my_stock_you_better_go_find/?utm_medium=android_app&utm_source=share)

No where to go but ■■■■ (or massive amounts of Crime, Leverage and Red days for the general market, but that's still good for GME the rising boat the economies life raft ■■■■■■■■)(oh and I can't forget the market place is also launching this month ■■■■■)
