I was looking hard about the Brazilian Stock Exchange Structure and found this document about the regulation for guarantee the trading equity in Brazil

Link for the official B3 document

Print of the page that contains pertinent information about that

And like that I found that MM can guarantee the equity with Gold and this is a fuc**** giant loop hole...

Maybe are others countries that also accept gold to guarantee a equity trade.

Maybe this is how the hide the shares, using gold, and maybe this is the reason Kenny need to go in person

But all that is just speculation... We need a verify source for confirmation

And also look at this comment in the post about Kenny fight plan

https://www.reddit.com/r/Superstonk/comments/pcnt8u/comment/hakylnu/?utm_source=share&utm_medium=ios_app&utm_name=iossmf&context=3%E2%80%A6

Zimbabwe is very rich in GOLD and they have a problem with smuggle of gold

Edit: Maybe this is a coincidence but Reuters deleted the reportage today... I didn't make a print, my bad...

So maybe we also should look at the price movements for Gold

And look ■ at this, UBS Investment Group Brasil broke a partnership with BB (Banco do Brasil)

And what service they offer???

Debt Capital Markets (DCM) We seek out opportunities for financing via both local and offshore issuance, structuring and executing operations to meet the specific needs of our clients.

I know this is a lot of maybes, but I think this needs more Eyes

Also UBS appears in the missing options for GME last month

TL;DR: So I'm speculating that they're using Gold to cash their FTD in the countries that accept that

guarantee. Brazil is one of this countries.

And maybe this is the reason that Kenny boy travels in person to all of this places. But I need to verify all this before. I don't have enough sauce yet.

So if the Apes can help me to look the bread crumbs about that, will be great ;)

And sorry for my English, not my primary language etc etc etc.
