I know its controversial but it's also something I'd like to know as a smooth brain. I have a trip coming up and wasn't able to come up with enough money as I would need for the trip so I sold 2 shares of GameStop on computershare (also so I knew how it worked to convince my friends to drs who are hesitant about how selling works). I sold at \$135 but only got \$208. Does computershare automatically deduct what taxes would be owed?
