Well guys I am a Peruvian ape, I have GME since January 2021 I was investing through eToro, now through IBKR waiting for my DRS, we have had to go through a lot but now is the time, with the hype that we will have tomorrow and all the overwhelming retail that can join we must educate them with DD so that all of them BUY DRS and HODL, remember the SEC report, because the number of investors who bought because of the hype was massive, we can now educate them and prevent them from being distracted by the MSM like that time in Silver XRP and other assets, it's time to add more to DRS, support our chairman and our favorite company and Hedgies r Fuck, let's go apes for everything! I love them like they have no idea! Read this pleasee <3
