Linked Post Content:

Hey everyone, first off I would like to just officially say hello to the Superstonk community as that of recently, I have earned enough karma to post on here. Very excited to be even more involved now!

I've heard that this DD has already been posted here before, but I wasn't familiar with it, so I thought I'd share. Forgive me if this is a repeat of DD

Secondly, I would like to give credit to "Marantz Rantz" on YouTube for this DD. I think he might be banded on this forum? However, I think we should certainly consider all this DD below. (I'm not sure what grounds he was banded on, but I hope you all find this information acceptable)

I felt that after seeing this, more people should hear about it. So that's what this post is for. Let's get into it!

****Executive Orders****

As we know from time to time, the President issues executive orders. This is a link to a majority of the executive orders through the US Department of Treasury. This is also the link to where you can find the document listed below. [U.S. Dep. Treasury EO's](<https://home.treasury.gov/policy-issues/financial-sanctions/additional-ofac-resources/ofac-legal-library/executive-orders-eo>)

1. ****EO #13959 -**** Executive Order 13959 of November 12, 2020 Addressing the Threat From Securities Investments That Finance Communist Chinese Military Companies [EO #13959](<https://home.treasury.gov/system/files/126/13959.pdf>)

When COVID happened, America refused to invest into Chinese companies. The president put out an executive order that US security companies like investment firms and such can no longer use Chinese companies as collateral. It said that in 60 days time we(US) are going to stop you from using that collateral. NOW, if you're short in a company, and you're using Chinese companies as your long, you're going to be in lots of trouble once they tell you you can no longer use that collateral. That's exactly what happens here. And the companies affected are all listed in this annex of the doc. So all of these entities were no longer allowed to be used as collateral while the 60 days came up.

****2. EO #13974 -**** Executive Order 13974 of January 13, 2021 Amending Executive Order 13959—Addressing the Threat From Securities Investments That Finance Communist Chinese Military Companies [EO #13974](<https://home.treasury.gov/system/files/126/13974.pdf>)

This executive order is January 13 2021. Now, this EO tells you that it's going to go into effect. It's done. It's set in stone. But what happened to the stock on this day is very interesting. I'll bring popcorn stock into the discussion because it is relevant in this situation because of the sanctions. Check this out.

<https://preview.redd.it/7041eeiukkz81.jpg?width=1478&format=jpg&auto=webp&s=88041cadba162c449b86fc201f90bb107b401440>

GME showing big spike while Popcorn shows nothing.

GameStop, on the 13th of January, when this executive order went to effect, you could no longer use collateral against it. Look what happened at GameStop on that day. There's plenty of little volume the days prior, but on the day of January 13th, you can clearly see what happens when you can't use collateral against it. As you can clearly see, nothing happened on the 13th and 14th with popcorn.

So why are these EO's margin calling these institutions, causing GME to run? These over-leveraged asset managers like Black Rock, Vanguard, and JPMorgan have serious exposure to Chinese companies that are included in executive orders. Those Chinese assets are being used as collateral by these US asset managers. And once their billions of dollars in Chinese assets and collateral become worthless, along with the problems of over-leverage with trillions of dollars of derivatives in notion...well...need I say more?

NOW CHECK THIS OUT

****3. EO #14032 -** Executive Order 14032 of June 3, 2021 Addressing the Threat From Securities Investments That Finance Certain Companies of the People's Republic of China [EO #14032](<https://home.treasury.gov/system/files/126/14032.pdf>)**

We all know what happened June 2nd, 2021... But let see what this EO says.

In Section 1 (c), it says the following: *(c) The purchase or sale of publicly traded securities described in subsection (a) of this section made solely to effect the divestment, in whole or in part, of such securities by a United States person is permitted prior to: (i)* ***12:01 a.m. eastern daylight time on June 3, 2022****, with respect to any person listed in the Annex...*

After this, you can no longer do that. All of the companies on the anex will be permitted up until June 3rd. If you look at the previous dates before these executive orders expired (or enforced), you would also see previous run ups right around those dates for GME .

WELL, what else is June 3? It's the day AFTER our annual shareholders meeting. It's that Friday, and what happens after that date? Well...it's a mystery right now but with the little information and everything that we have going off of right now including the shareholders meeting and everything else might as well be a launch date. But of course we really don't know the outcome of all these events together. So I'm not really putting dates on anything...But why not hehe for kicks and giggles.

-SUMMARY

This is what we're looking at right now. It's a one year cycle. And I'm excited. I wouldn't be shocked if RC knows these things. He certainly is a genius and it wouldn't surprise me. But if he's picking his dates based off of this? Based on this kind of movement that THEY can't use, stuff they can't use to short against us anymore or they can't use the collateral against this anymore because we own everything? What are they gonna do now?? And what are they doing... They're killing crypto, they're stealing all the money they can before they have to get to these dates on these platforms.

Regarding this incredible article: [2022: Year of the MOASS \[8 Reasons Why ∞ Soon\]](https://www.reddit.com/r/Superstonk/comments/uf8pm6/2022_year_of_the_moass_8_reasons_why_soon/) has led me to believe that ALL these catalysts will cause the MOASS. They will all act together...and it's only time.

****TL:DR**** These three executive orders have led to major run-ups due to shorts and collateral through Chinese entities. GME has clearly been affected by these and could possibly coincide with one of them expiring June 3rd after the shareholders meeting.
