OK. Here's a problem that I see with the FTDs. The data posted on Tuesday was for 2/1 - 2/14....

Supposedly this is incomplete data and is never released until the subsequent 2 week period leaving it 2 weeks out of date. Yet, the data I saw was current and matched up quite well. Now, they've produced a second set of data labeled 1/15-1/31 and say that's the real FTD data for the second half of January. If this information is readily available upon the closing of the 15 day cycle, why are they waiting two weeks to release it?
