I dont think its a secret Bitcoin etc rose at the same time as GME over a year ago (full disclosure I am not invested in Crypto). Over the course of my observations I've noticed a pattern not just in the stock market (which I think we all know) but also Crypto. I have documented some charts over the past few weeks (Figured also post so documented here). I have long speculated Crypto being used for liquidity.

I have also tracked Citadels latest 13F which seems to be mostly options - also see a pattern here..

Obviously this is not financial advice and just speculation & opinion. Thoughts?
