So what's this all about ? Well, here's a tldr for people in a hurry..

The tldr; My brain got thinking and came to this simple conclusion. We will not get paid in any type of fiat, be it cheque or wire transfer. But rather crypto and tons of it.

Why ? Because light and dark cannot co-exist (excuse the analogy)

Let me explain..

So you believe that in order for GameStop to have true price discovery, any short bets on the company need to go bye bye (close out their positions).. if you said yes then give yourself a pat on the back.

Now, when this happens the price will climb as they continue to buy back stock they had previously borrowed to short and return to their rightful owners.

But wait, if investors are true in their thesis about how GameStop is a game changer and will literally revolutionise the world of gaming as we know it.

Then there isn't really a reason to sell.. At least not yet.

"What!? But I want my tendies"

I'll stop you right there.. this is the part my brain came to terms with the scope of the reality.

Ever thought about where you're going to put this new found wealth ?

"Well, the bank duh ?"

I beg to differ.. see you can't have your bread buttered both sides.
There's no banks on the moon, you see ?

With this being said, how would you get a return on your investment !?

Quite easy, actually.. you wait and wait and wait some more, until Computershare issue the Crypto based shares directly to your L2 wallet.

Don't believe me ?

Watch this:

[@27:24 - @31:32](<https://m.youtube.com/watch?v=LVEJo87jejo&t=1644s>)

Taken from their very own AMA 11/4/21. Here's a quote from Paul Conn, President of Computershare:

"And we have now, for a number of years now, had the ability to connect a blockchain to our registry platform so that we can credit the security, if it is in fact a security, to the ledger"

He then continues to say..

"Depending on whether it's a perk or a security, might influence how it has to be, physically distributed to the owners of the company (retail).. We need to sit with the client (RC&co;) ... how we get it from them, to the shareholders. That's what we specialise in. If it happens to be a blockchain based entitlement we'll

work with them to work out how we can get all of the Wallet addresses..”

Loopring enters the chat.

Our new “Be Your Own Bank” (and yes these wallets will be allowed on the moon).

Anyway, this isn’t financial advice and is speculative in nature. Do you what you want with your money.

Peace !))
