“What’s an exit strategy?” - DFV

“Deciding between two options for my GME shares: HOLD or HODL” - RC

“Infinity pool” - Blue

“The divide in value between businesses that just have customers and businesses that have community + customers is becoming more stark. To many, community has historically been a nice-to-have. In the future, community will be the key value driver of the entire business.” - LC

“I was born to work” - RC

Money is made up, exchanging favors are real.

Job titles are made up, adding value is real.

These men are painting a picture of a new financial mindset. One where the goal is adding value with the understanding that the money will follow. You need peoples trust more than we think.

If you were to take money away for just a moment, what would you add in value?

What if everyone had money, enough money that jobs were optional. Would people still work? What would you add to your society or community? How would you spend your time?

The only slimmer I have for the US right now rests in the educated organization of groups that are standing up against centralized systems, monopolies and corporate billionaires.
