Hello UK Apes, gosh the weather is not doing to bad over here is it? Hope you're all well!

I've reached my breaking point with eToro and decided, I want my fucking shares in my name. I want them. I shall have them. I like the stock.

So I will lay out my plan for leaving eToro and going all in on DRS'ing my shares!

If you already have a ComputerShare account set up and ready to go, here is my plan of action first thing Monday!

Key requirements:

Fully set up ComputerShare account (Preferably with a share(s) already in there)

Fully set up eToro account (Obviously lel)

Fully set up eToro Money account (With bank details pre-added)

Fully set up Wise Money account (To convert funds/buy direct from ComputerShare)

The Problem.

As we are aware, we can't DRS our GME positions on eToro for a variety a weak and dumb reasons. Due to this, our **only** option is to close our positions, withdraw the funds to our bank and buy elsewhere.

The problem? Bank transfer from eToro to our banks takes DAYS. Days that could be the difference between getting a great discount or suffer a huge price hike, meaning we could end up with less shares than when we started... No thanks! As someone broke as is it, every precious share matters to me. Not ideal!

The Solution.

1) EToro provides a quick way to withdraw funds to your bank account, by using their proprietary money app: eToro Money

Apparently, eToro claims that any withdrawals to and from this account are near instantaneous. This is great news. What's even better is there is next to NO SETUP required for existing eToro accounts, as it links directly and uses all your info all stored! Easy!

What to do, when closing your position on eToro, is choose to close and have the money go directly to the eToro money app.

When the money is in this app, make sure to add your bank account details beforehand, and then withdraw your funds to your bank!

[It's easier to navigate the app on mobile FYI](<https://preview.redd.it/nyls0xvgnbv81.png?width=1140&format=png&auto;=webp&s;=010febd38d532baf7c1e85e4639ae09ddb755820>)

2) Now the funds are in your bank, the plan is to now add those funds straight into your WISE account funds. ComputerShare requires appropriate chequing details that WISE is able to provide for worldwide Apes!

Here is the best tutorial for DRS'ing that involves using a WISE that explains why it's needed/useful:

(https://www.reddit.com/r/Superstonk/comments/q415wd/10_steps_to_drs_and_buy_directly_on_computershare/)(https://www.reddit.com/r/Superstonk/comments/q415wd/10_steps_to_drs_and_buy_directly_on_computershare/)

[Make sure you finish setting up your account like I need to do first thing!](<https://preview.redd.it/3wvpbybnbv81.jpg?width=1456&format=pjpg&auto;=webp&s;=f16eaea0f4de2347cc0e97e30509ca269d92263f>)

3) Now the funds are in WISE we are properly set up to buy from ComputerShare and add more shares to your account! Simply click 'Manage Investment Plans' then click 'Buy More' under GameStop. Then make sure to select 'One Time' buy, then input your fund amount! Next step should be the technical chequing information, use the link provided below that explain this!

I once again refer to this post here that explain the rest for this too:

The Outcome:

That should be it! In theory, this should not take no more than an hour or two. I'm going to be doing these things on Monday and will happily report back the outcome and whether I either lost shares or fully got them all back in ComputerShare!

TLDR;

Close eToro position into eToro Money->

Withdraw eToro Money into bank account->

Deposit funds into WISE account from bank account->

Buy more in ComputerShare using your WISE chequing account function.

DONE!

Wish me luck Apes! So happy to be fully DRS'ed once and for all!

Have a great weekend!
