I am not sure if anybody here has posted this yet, but I was inspecting the source code for the arcade game NFT

and there are several references to 'don't get rugged'

Also, about 3/4 the way down the .js code, there is a block of text about a thousand lines long. If you decode it in base 64, you get the source code for the game.

Other than this, I couldn't see anything other than what has already been uncovered.
