I'm from Europe. So I've been trying to figure out how to DRS from my broker Swedbank for months now.

After months of messaging my brokers, what I've figured out so far is:

- * Swedbank only offers SSI transfers
- * my other broker, IBKR, that supports DRS transfers, only supports Basic FOP transfers within EU
- * I'd need to transfer my shares from Swedbank to IBKR, to DRS them at Computershare
- * After initiating Basic FOP transfer on IBKR and waiting several weeks, my SSI transfer on Swedbank side expired, with no contact from either side where the transfer was, which just ended up costing me the transfer fee with no outcome
- * from what I understand that after I initiate DRS from IBKR side, I will need to wait for a letter from Computershare to validate share ownership

So I'm a bit lost here, if there's anyone who's attempted a similar transfer process here, any advice on how to get the ball rolling? So far it seems like I keep coming up at dead ends.

Thanks.
