Gamestop's / GMERICA's Decentralized Blockchain Exchange for Stocks, Crypto, NFTs, etc. Will Annihilate Its Competitors: Head-to-Head Comparison Between It and DTCC's and Citadel's (BSTX) Blockchain Stock Exchanges! ■X■ VS ■

****By definition of what it is and what it can do, Gamestop / GMERICA's new blockchain technology powered by** [Loopring](https://twitter.com/GameStop/status/1506653012059738114) ****will be the fairer, more transparent, decentralized exchange that will inherently be the preferred location that eventually most (maybe all) companies will want to migrate their stocks to.******

Will Gamestop / GMERICA's blockchain exchange work perfectly efficiently without bugs on Day 1? I don't know; however, what truly matters is the heart and philosophy of the Gamestop / GMERICA's blockchain exchange: Fair, transparent, decentralized.

Any mention or claims of Gamestop / GMERICA's ideas or plans will be referenced throughout this post or at the bottom with links.

The DTCC and BSTX represent the absolute opposite values as GME X Loopring: unfair, dark or obscure, private or centralized.

The idea of blockchain technology to enhance or replace the stock market has been around since at least 2015 since Overstock helped introduce the idea, so why are the DTCC and Citadel in such a rush in 2022 to release their own ■ version of a blockchain stock exchange?

[SEC Approves Plan to Issue Stock Via Bitcoin's Blockchain](https://www.wired.com/2015/12/sec-approve-s-plan-to-issue-company-stock-via-the-bitcoin-blockchain/) (2015)

[New technology could change the way the stock market operates](https://www.businessinsider.com/block-chain-could-change-the-way-the-stock-market-operates-2017-4) (2017)

[Blockchain Technology Set To Revolutionize Global Stock Trading](https://www.forbes.com/sites/ericervin/2018/08/16/blockchain-technology-set-to-revolutionize-global-stock-trading/) (2018)

Perhaps the DTCC and Citadel heard on [August 29, 2021](https://www.reddit.com/r/Superstonk/comments/pe37k7/the_gme_warpath/) (likely even much earlier) about a googly-eyed, chair-like, King Kong type of guy innovating a revolutionary idea that would make the DTCC / NYSE obsolete. u/sharkbaitlol said, "As if this concept wasn't already crazy enough, I personally believe GameStop can take it even further. Not just a market place for items in games, but a

market place for: ALL INTELLECTUAL PROPERTY. DRM-Free digital games that you can buy/sell anytime you want (a massive limitation with today's digital shops directly from PlayStation, Microsoft, Nintendo), Movies, E-Books, Music, Tv shows, podcasts, paintings, 3-D renders, stocks, deeds. The ambition of becoming not only the fucking KING-KONG of not only eCommerce, but intellectual property too."

If the DTCC had pure intentions to make the stock market a fair place for retail investors, why didn't it release a blockchain exchange in 2015, 2016, 2017, 2018, 2019, [2020](<https://www.ledgerinsights.com/dtcc-blockchain-tokenize-private-securities-public-ethereum/>), or [2021](<https://www.dtcc.com/news/2021/november/09/dtcc-to-launch-platform-to-digitalize-and-modernize-private-markets>)? Did the DTCC and Citadel hear about a rocket or something that may be mooning in 2022 for them to be [acting so hastily](<https://www.ledgerinsights.com/dtcc-private-digital-stocks-public-blockchain-2022/>) this year? Who do you think would win in this fight: DTC X BSTX VS GME X Loopring?

(<https://www.sec.gov/rules/sro/box/2022/34-94092.pdf>)(<https://preview.redd.it/pbz01ne8r8s81.png?width=2545&format=png&auto=webp&s=f2cf5bbdd3c762f8a2773b7b451d55fc74a12f2f>)

The DTCC announced [Project Whitney](<https://www.ledgerinsights.com/dtcc-private-digital-stocks-public-blockchain-2022/>) to go live in 2022 to explore tokenizing private securities on the public Ethereum mainnet. Since then, it consulted widely and now plans to launch a solution with tokenization only as an option. And even then, much of the legwork happens on a centralized system. . . . Users can only buy via a broker or exchange. The DTCC plans to release [Project Ion](<https://www.ledgerinsights.com/dtcc-plans-go-live-of-blockchain-stock-settlement-project-ion-in-2022/>) in 2022 also, which plans to shorten stock settlement times.

On the other hand, Gamestop / GMERICA will have a decentralized system that will [eliminate the middleman or broker](<https://twitter.com/loopringorg/status/1461411897966743553>). In fact, [the very idea of banks](<https://twitter.com/loopringorg/status/1469082895591612422>) themselves may be revolutionized or replaced! Perhaps Gamestop / GMERICA will have you, the individual, be your own bank instead of trusting these malicious parasites that [exploit the poor](<https://www.businessinsider.com/elizabeth-warren-grills-jamie-dimon-chase-charging-overdraft-fees-pandemic-2021-5>), are "too big to fail," are [literally in bed with the DTC](<https://www.dtcc.com/~media/Files/Downloads/client-center/DTC/alpha.ashx>), etc. As mentioned by numerous posts in r/Superstonk and other GME-related subreddits, the DTCC is a dark and mysterious cancer upon the American financial system that was brought to light to apes via u/atobitt using Queen Kong's wisdom, and the House of Cards was the initial chemotherapy and radiation.

The DTCC is centralized, and anything associated it cannot be 100% trusted: single point of failure, scalability limitation, third-party involvement, full control stays with centralized authority—many disadvantages exist with a corrupt, centralized system. The fungibility of stocks is what the DTCC is all about, and predatory naked short selling is possible in the first place because stocks held with your broker and owned by the DTCC are fungible. Any desperate tactic by the DTCC that attempts to replicate Gamestop's / GMERICA's blockchain exchange is futile if the underlying philosophy of the system is evil to begin with: centralization is ■.

The Gamestop / GMERICA blockchain exchange will feature much less fungible or non-fungible entities (hopefully like the "OG NFT" or *Once Upon a Time in Shaolin*).

<https://preview.redd.it/6jvcdspn49s81.png?width=1600&format;=png&auto;=webp&s;=3c5477253d78708c2d006829e296ad06a899b6fe>

U.S. SEC [approved](<https://www.reuters.com/business/us-sec-approves-new-us-exchange-with-blockchain-feed-faster-settlement-2022-01-28/>) a new U.S. exchange with blockchain feed, faster settlement: BSTX. In addition to traditional pricing data feeds, BSTX plans to offer a market data feed that will operate on a private blockchain. That feed will allow exchange members to see their own activity, as well as the activity of other BSTX participants on an anonymized, delayed basis, the exchange filing said. BSTX will still utilize [DTCC technology](<https://www.sec.gov/rules/sro/box/2022/34-94092.pdf>).

"Private," "anonymous," "delayed"—these terms associated with BSTX are opposite to what Gamestop / GMERICA's blockchain exchange will be as [stated](https://www.reddit.com/r/Superstonk/comments/sv6ytf/sec_approved_the_1st_blockchain_securities/hxefh9j/?utm_source=reddit&utm_medium=web2x&context;=3) by u/Nickel_Bottom. As u/neofux [said](https://www.reddit.com/r/Superstonk/comments/sexo5b/us_sec_approves_new_us_exchange_with_blockchain/), Citadel is involved with BSTX and part owner. Citadel is responsible for predatory naked short selling GME to unfathomable levels, and its tactics are made possible by the system in place at the DTCC.

u/Laserhawk_ provides a [comment](https://www.reddit.com/r/Superstonk/comments/scw02d/comment/hu9c10y/?utm_source=reddit&utm_medium=web2x&context;=3) and [another one](https://www.reddit.com/r/Superstonk/comments/scw02d/dtcc_to_launch_project_ion_t0_settlement_in_q1/hub42dj/?utm_source=reddit&utm_medium=web2x&context;=3) about Hyperledger:

Here's what you need to know about what the DTCC is doing. They are using Hyperledger, which is off Chain data. They can manipulate the data and then write the manipulated data to Hyperledger, and then report that publicly.

Hyperledger is an enterprise blockchain and is not subject to public validators. So you can write to a SQL database first and then create records into Hyperledger.

Hyperledger is a centralized blockchain and the enterprise owns the chain data not the public. No POW, POS, POH (proof of work, proof of stake, proof of history).

There is speculation ([in this thread](https://www.reddit.com/r/Superstonk/comments/qq55ak/the_dtcc_just_released_a_statement_this_morning/)) as to whether these new DTCC-based blockchain stock exchanges are a way to try to accommodate a Gamestop NFT dividend so that Gamestop will not have an excuse to pull all of its stocks out of the DTCC onto a new decentralized, Loopring-based blockchain exchange. Another speculative answer is that DTCC is desperately trying to compete with Gamestop and scrambling to come up with a blockchain stock exchange before or around the same time Gamestop launches theirs. A chess move that may overcome all of fraud perpetrated by DTCC is a stock dividend that launches MOASS and proves the hidden short interest, phantom shares, and other treachery in the DTCC. By the way, BSTX [will not](<https://hypebeast.com/2022/1/bstx-first-us-blockchain-based-stock-exchange>) have crypto or NFT trading enabled. Will the DTCC have NFT trading enabled?

By definition, Loopring—which announced an official partnership with Gamestop—is [decentralized](<https://twitter.com/loopringorg/status/1441356648551833610>).

Did you know that the [NYSE is a for-profit organization](https://www.reddit.com/r/Superstonk/comments/t3uge/nyse_new_york_stock_exchange_is_not_your_friend/)? What prevents the chairman of the board of Gamestop from launching a stock exchange to directly compete with the NYSE? [user/Arkayb33/](https://www.reddit.com/user/Arkayb33/) [said](https://www.reddit.com/r/Superstonk/comments/rgcvqa/if_you_are_skeptical_about_a_blockchain_exchange/), "Netflix didn't have to ask for Blockbuster's permission to start its movie rental company. . . . GameStop, Loopring, RC, whoever, doesn't have to ask the NYSE, DTC, or Citadel for permission to create a decentralized exchange build on the blockchain. They can just do it, and, if their offering better meets the needs/wants of their target market, clients will move over to the new system."

GME X Loopring can also [compete](https://www.reddit.com/r/Superstonk/comments/rzw5o8/comment/hrxt51p/?utm_source=reddit&utm_medium=web2x&context=3) with OpenSea! [user/-LexVult-](https://www.reddit.com/user/-LexVult-) said, "I also want to add that every NFT creator on opensea and every other platform will jump ship to gamestop's NFT market because of how cheap they can mint NFT's. It's a no brainer. Why spend \$500 when you can spend \$2.50 using loopring? That increases profit margins by an insane amount."

****The blockchain exchange birthed by Gamestop (GME) / GMERICA will revolutionize the global economy. It will use much less fungible or non-fungible technology to eliminate predatory naked short selling, which Gamestop was one of the biggest victims of in all of US history. The stocks held by your broker and owned by the DTCC or Cede & Co. are fungible, and this fact made predatory naked short selling possible in the first place. Any desperate tactic by the DTCC that attempts to replicate Gamestop's / GMERICA's blockchain exchange is futile if the underlying philosophy of the system is evil to begin with: centralization is ■.****

P.S.

The early days of the internet are considered by many to be primitive but thriving and vibrant: it was the "Wild West" of cyberspace back then, but at least it was more decentralized. Twitter founder Jack Dorsey said he's 'partially to blame' for [centralizing](<https://www.businessinsider.com/jack-dorsey-partially-to-blame-for-centralizing-the-internet-regrets-2022-4>) the Internet and that he regrets it. [When it comes to decentralization, don't call it a comeback.](<https://twitter.com/ryancohen/status/1486867794650087427>)
