**Phase IV - The holy fuckin grail. The true meaning behind 741 = erc721 (smart contract) + erc20 (fractionalized token) = 741.** This is the execution. The ender of the first game and the start of **New Game +**. GME traps shorts through their 1st share offering of 5m shares which had massive strings attached. The minute those were shorted, HF = fukt. **GME states they can issue new security on a novel market if the depository in control fails to issue out an alt payment sent out to their investors. Since they shorted the shares...they would be forced to get em back. Which they can't. So either the D.T.C does a recall or GME leaves, and the recall happens on its own. erc721 = global security holding valuation of the entire float, but existing on E.T.H blockchain. It is the bridge over. erc20 = a fragment of erc721 equal to not just the OG float...but *also every other synthetic created held by apes.* It can be dished out on the new market, in which the announcement alone of...would trigger the squeeze, not on one market...but *two.***
