Hello DDintoGME Apes!!!

I have not posted my daily heats maps of the GME options chain per instructions from the mods. They want me to limit my posts to once per week in order to keep things more organized in this sub. I am honoring their instructions and will only post the weekly update here. Mods felt that my daily posts were either Spam, Memes, or Low Effort. (I disagree, but I'm guessing that if I did not comply, then I would be banned.) If you wish to see the daily posts, I have continued to post them in other subs. You can check my profile and you will find them there.

So, here is last week's weekly heat maps.

<https://imgur.com/a/0Pz5ihj>

Date range info:

- 1) Open interest at the end of Trading Friday 2/4/2022.
- 2) Change in open interest from close Friday 1/28/2022 to close Friday 2/4/2022.
- 3) The total volume from Monday 1/31/2022 through Friday 2/4/2022.

The first chart is the calls. It shows the three chosen metrics. It shows every current expiry and every strike price.

The second chart is the puts. Again, all three metrics. Again, every current expiry and every strike price.

The last chart is the summary table. It sums up the three metrics at each strike price but summed across all of the currently available expiry dates. A higher level look at the numbers than the other charts.

Obligatory: This is not financial advice.
