

Title: ■■■■■Computershare Update: They won't execute any online order past \$9,999,999 (\$10 Million).
How do we secure an infinite squeeze order past this amount? ■■■■■

I'm not authorized to post on Superstonk but I'm hoping we can get the MODs attention over there to reach out to the CEO of Computershare again to see if anything can be done about this.

I just confirmed in chat with Computershare this information and the supervisor approved his answers as I didn't want to spread FUD. I believe this is new information for all of us as I reviewed the Computershare AMAs. What I believed we all knew until now is you can submit an online sell order = or > \$1 million and you can't have a total of open/pending orders that is = or > \$10 million.

But this information is new to me:

COMPUTERSHARE CHAT:

#1. Let's say the stock gets to 5 million. I put in a limit order for 4 shares at \$214,700 which is \$858,800 (under the 1 million to get approved for an order). But since the market is at 5 million and it is an order for 4 shares - which would be \$20 million - you are saying it will not actually execute because the market total exceeds 9,999,999 total?

- Computershare Answer: Yes, it will not be executed as it's over the sale limit IF and ONLY if the shares are trading at \$5 million a share.

#2. Submitting an order for 1 share with the limit price of \$214,700 but the market price is \$15,000,000 it won't get through because it exceed \$9,999,999 total?

- Computershare Answer: That's correct as it's over the online sale limit.

#3. If the price gets to \$9 million, and I submit a limit order for \$214,700 - will this go through?*

- Computershare Answer*: if you're only planning to sell 1 share and the price isn't over the online sale limit, it would be executed, IF there's an available trade/buyer.

#4. If the price gets to \$9 million and I submit a market order at that time, will this go through? The market price is for \$9 million which is over the \$1 million per order so will that go through or no?

- Computershare Answer*: It will depend how many shares you will sell. If you sell 1 share only while the market price is \$9 million and there's an available trade/buyer, it will go through. However if the shares to be sold is over the sale limit, it won't be executed.

*Summarized from actual since there was back and forth on # of shares and initial confusion on his end.

*****Final answers all confirmed by a supervisor*****

Only way to sell = or > to \$10,000 is the following:

- * Send a signed written request but you won't be able to sell it by limit order as it will be sold by Batch Order instead.

- * Snail mail from only (no fax or email)

- * Can't send 1 letter prior with future requests to have on file. They won't keep it.

- * Send letter when it hits price to sell with amount of shares to sell at that price.

- * NOTE: Written sale requests are always processed by Batch Order however, the processing time may be up to 5 business days + Settlement + Delivery.

* Address:

- By United States Postal Service:

Computershare
PO BOX 505000
LOUISVILLE KY 40233-5000

- By Overnight Courier (FedEx/UPS/DHL, etc.):

Computershare
462 SOUTH 4TH STREET
SUITE 1600
LOUISVILLE KY 40202

Discussion:

If this is old info, just delete this post or use it as a discussion to how to secure any amount past \$10 Million. I still have 3 shares at Fidelity. But does anyone know of a brokerage that has an unlimited sell price cap and didn't previously turn off their buy button, don't use a corrupt clearing house, easy app access to sell via IEX? I wonder if I should move or buy a few more shares there for the ones I want to let ride but still sell at the top. Leaving all the ones in Computershare of course.

TLDR: Can't sell a GME share = or > than \$10 Million through Computershare's online system.

I can share the video of the chat with the MODS since it won't let me post it.
