Hey everyone! I post a couple days ago saying that we were going to see some big green candles [https://www.reddit.com/r/GME/comments/uwcauo/gme_is_about_to_have_a_positive_crossover_on_the/?utm_source=share&utm_medium=web2x&context=3](https://www.reddit.com/r/GME/comments/uwcauo/gme_is_about_to_have_a_positive_crossover_on_the/?utm_source=share&utm_medium=web2x&context=3) I was off by one day. Please give me a little slack, I literally am retarded and eat crayons. The indicator I was using for the was the positive crossover on the MACD on the 1 day chart. Another really bullish indicator I use and one where we see even BIGGER green candles is a positive crossover on the 1 week chart. Well Guess what! we had that happen today, Way quicker then any crossover we have seen before. That makes me think that we are going to be on the way to Uranus tomorrow. Max pain is 99, so anything over that will make next Tuesday be a massive day due to T + 2 from MM's not hedging properly.

[This is the 1 day chart](<https://preview.redd.it/1vnfsrcpjw191.png?width=1131&format=png&auto=webp&s=15fdb4e4bec70a6a2825282564d08e3a12fce47c>)

The purple circle is showing the Crossover on the MACD, notice how we see green candles when that happened?

Stoch (blue) is going up and Diverging

A/D (orange) - going up and about to break a critical resistance

Aroon (pink) is almost going straight up

Overall - GME has a lot of room to go up. The really exciting thing is the crossover on the 1 week! which happened today. So I'm expecting a big hulk candle tomorrow.

[This is the 1 week](<https://preview.redd.it/j75n4xhkrw191.png?width=1139&format=png&auto=webp&s=79f9084b30add552dd44a72ab7c4f6b9b081899b>)

I normally don't post 2 Ta's in 1 week. This is a special occasion! There is a cross over on the 1 week that happened today!

It is highlighted with the purple circle I didn't think this was going to happen until next week. The fact that happened today tell me tomorrow is going to be a huge day!

Bolinger bands have been tightening for a while indicators a big move is coming soon.

Stoch and Aroon are neutral with bullish momentum.

Overall - Tomorrow looks like it is going to be an explosive day. I wouldn't be surprised if it went 200 +

There you have it. Looks like the rocket is started and we're on the way to Uranus. I love you guys and I am happy to have met you all. I would just like to remind you that the true Moon shot isn't until closing goes to the DTCC computer. that will happen when shitadel and friends get liquidated. The significance about going to the DTCC computer is that it does not care about price and will purchase what ever share is

available at whatever price until the books are balanced. I'm curious to see what happens when it goes to the computer and there are no shares for sale.

TLDR: A cross over on the 1 week MACD happened today. This will lead to a really big green candle

TARD: BUCKLE UP! WE'RE ON OUR WAY TO URANUS!
