max pain site: [<https://swaggystocks.com/dashboard/options-max-pain/GME>](<https://swaggystocks.com/dashboard/options-max-pain/GME>)

What does the y axis of the first chart represent? Why is it in the billions for expirations this week and in the millions for next month?

The second chart, open interest, seems to reflect only 100s of contracts with open interest, which I can't connect to the max pain being in the billions.

Is there a reference somewhere for what the y axis of these charts represent?
