I'm an individual investor so I don't care what you guys are doing.

I remember that all I need to do is buy and hold. My position isn't in any danger, I'm normally long term hold anyway so I'm not looking at the ticker every 5 minutes and losing my shit on red days.

I remember that the shorts need to spend more money every time they reup their shorts. I remember how the fees for short contracts are getting higher and higher every month, and lendable shares are getting harder and harder to find.

I remember that even though I can only afford to buy one or two shares a month that the whales are buying thousands and thousands of shares every month, locking the float steadily but surely.

Fuck, I remember when we weren't even 10% locked, now we're at 51%, that still blows my fucking mind.

I remember that Kenny boi is flying somewhere every month to get new \$500 million dollar loans to keep his play a float. This is my favorite part, Kenny is literally going into debt to keep a short play going. That's like cutting off your leg one inch at a time to stop a poison snake bite.

I remember the DTCC committed international securities fraud by holding onto the shares they were given by CS and Gamestop, instead of giving them to the shareholders.

I remember how the shorts never covered.

And I remember that all I need to do is wait. Wait for them Tendieman, for he cometh.
