Serious question, what do you believe is the best way to secure and/or maximize your tendies? I see basically two ways of keeping GME your shares, 1. DRS them at CS, 2. Keep them at a broker.

Assuming at some moment the rocket will be properly filled for lift-off and we launch and the price goes to a million, ten million, whatever, what do you think will provide the best return: 1. The DRS'ed shares that can (online) be sold to a max of 214k per share or 2. the broker that would basically allow you to sell at whatever price but might screw you over.

Thoughts?

FYI I hold about 90% at CS and 10% at DeGiro.
