1) Does the GameStop wallet chrome extension only work on desktop and not mobile?

2) I see the iphone app is coming soon... what about the other more than half of the population that is on Android?

This makes no sense to me to push out a "digital" NFT marketplace when the wallet they want you to connect to it does not work from your phone.

Also, unless Apple and GME have some insane partnership agreement with Apple bringing a ton of value to the NFT marketplace I don't get the exclusive appstore rights out of the gate.

This was probably already dissuaded but can some one enlighten this smooth brained ape?
