TADR: Highest price you can sell Gamestop on CS is \~200k usd with \~10m usd transaction limit per sale request. Other brokers have their limits as well. Limits too low. Need spread awareness. Need solution.

****Intro:****

Hey everyone, I feel this is not talked about enough, let alone finding a solution to this problem. Thus, I felt the need to start this discussion, in hopes to spread awareness, and hopefully, find a solution to this problem with all you beautiful apes.

****Problem:****

Last week the video about a sell limit of \~200k usd per share on Computershare came about. On top of that, there is a \~10 million usd transaction limit per sell request. This equates to about 50 shares sold at 200k as the limit. Market order is a different story but that runs its' own risks and may not be the best for the squeeze (not sure why, I am too ape to know the dd behind this). After knowing CS' limits, I called to see if brokers had their limit sell price and transaction limits. Turns out, they too have these limits! If we do not spread the word, and hopefully find a solution, it would mean we cannot sell our shares above our floor with the current setup. We will see the price rocket to high levels but because of the limits on CS and brokers, we can never cash out even small % of our shares. This is a HUGE problem!!

****Personal Clarification:**** I am 99% DRSED but I few shares in various brokers to spread out my risk and also sell for cash when we hit moon levels.
