This might have been discussed already but I did not see it anywhere:

KG is going all in on DeSantis as president. Citadel's move to Florida is a major feather in DeSantis's cap - a huge financial institution bringing tax revenues, jobs, and high spending employees. Expect massive campaign contributions.

In return, he hopes for a presidential pardon. KG knows that his days are numbered. The fraud and corruption makes Bernie Madoff look like a Mr. Rogers. The evidence is mounting on a daily basis. KG is reading the news seeing RICO written in the same line as Hwang and Archegos.

He knows he's got one shot to get out of this mess. It's the ultimate get out of jail card - a presidential pardon.
