Reddit vs hedgefunds is like Venezuela vs the United States, it's simply impossible. A lucky thing happened with that Melvin Corp thing and now everyone thinks game will go super god mode any second now and even though it simply does not. I've read so many posts about how this time this week it WILL moon there's no denying it, just for game to be down the whole month. Am I missing something? Please educate me.

Inb4 GME to the moon!! Still hod!! This time it's different!
