■■■■■ "Dividend is Coming" ■■■■■

It's been nearly 50 business days now of 100% short-borrow Utilization on ■G M E. I am happy to report that \$137 may very well have been the 'absolute best' they \[soon-to-be-law-abiding short-sellers\] could ever do in manipulating this down after they fell into the March 17 earnings / dividend announcement bear trap at \$75 that was creatively set up by Chairman Ryan Cohen and ship's crew. Thereby, a long-rolling rise \[with gamma effect similar to Tesla/Overstock\] is likely now just starting to be in progress, with the only question mark being just how high GameStop will go, and how long it will take. ■A M C too could become entrained upwards in the GameStop rise due to their close ties via ETF baskets and algorithmic correlation, but this is still only theoretical. GameStop, after all, is the de-facto-and-shiny-new toy that everyone wants, due to the coming Dividend, the date of record of which could arrive in about 40 business days.

Even though GameStop has been sold short (and only as reported) more than both Tesla and Overstock were- GameStop's stock price, [based on the arithmetical means of both Tesla's and Overstock's timelines after dividend announcement AND distribution](https://www.reddit.com/r/DeepFuckingValue/comments/u33zs2/the_good_truths_about_gamestops_coming_moass_the/), may 'jump' in valuation to become 34.5x or more of its current market capitalization by the timeframe of April 4th, 2023 to June 15th, 2023. This assumes a Dividend issuance in mid-July 2022 for GameStop. *However, if GameStop follows Overstock's timing and magnitude, then* ***GameStop would reach more than \$4,000.00 per share (using pre-split pricings) by Friday, October 14th, 2022***.

Technicals

[■ G M E ■ It's going to be good-fun this Spring, with an even better Summer](<https://preview.redd.it/msgp74u4gju81.png?width=949&format;=png&auto;=webp&s;=c71348a522f4c96b03044aabe6651ec1d5b72851>)

Investments: Raw Shares with some In-The-Money Calls

Different types of possible investments in GameStop (■G M E) for those who understand what a stock dividend does to any stock, let alone 'the first 'super stock' in history that clearly everybody likes':

* **Safe**: Buying raw shares, and immediately DRS shares to computershare.

* **Cool**: Long term (1 to 2 years) Just-At-The-Money Call Options (little to no risk, but epic gain with dividend after the options multiply by 7x each on the split - and then DRS shares to computershare immediately after exercise.

* **Smart**: Deep-In-The-Money-Strike, In-The-Money-Strike, Just-At-the-Money-Strike, or Only-a-few-dollars-out-of-the-Money Call Options (short term) with the expectation of exercising those calls at expiry - and then DRS shares to computershare immediately after exercise. \[note that calls that are too out-of-the-money have low likelihood to expire in the money and this has been equivalent to giving money to the call writers (hedge funds)\]

Think Long Term - It will be a Good ■Spring■ - But it will be an even better ■Summer ■

[There is a potential to rise similarly to Tesla\Overstock. With Overstock's Timeline, GameStop's market cap could rise by more than 3,450.00% by EOM October 2022.](<https://preview.redd.it/arvx7wazbju81.png?width=1208&format=png&auto=webp&s=5aa50cfe7dd5a8f5bf2c3e63fc02ac0c10757f0f>)
