Nah...✂️🛩️✂️🛩️...🛩️🛩️..

✈️, ✂️, 🛩️, 🚀 take off and land daily. 🧑

I fail to see how that could be connected to Crypto activities. I also don't get the stalker level interest in Kenny's physical location these last few months. All that energy that could better utilized. At this point what Kenny himself does and where he does it really shouldn't matter.

People have spent so much time trying to track this guy than on removing some of the bricks from the foundation that is Citadel. Missing opportunities left and right to actually do something. I provided just 59 out of all off the trails(oops..🙄) of the ways to "attack" via the 💰. Crypto included. Yet...far too many are interested STILL in actual conspiracies.

My questions: if the planes landing and the crypto movements do in fact correspond..Did anyone do the obvious and profit? Or did they just sit and watch?
