Yes, I know you've seen this... but I'm a data guy.

You know why this Jack's my tits ? A major and extremely high profile DATA ANALYTICS company just said a black swan even is so immanent they are willing to use \$51 million to buy gold and hedge against it. A leading data analytics company, who analyzes data (market data if they'd like) and bought a shit tonne of Gold.

Yea that should get you going a bit! Lol
