As the title says, everyone is wondering what is happening with all the split dividend fuckery and that things, we were thinking that when the last ftd data came out, we would see something relevant on GME, but seems there were not to many FTDs there, so i've been searching the ftd data of all ETFs that contain GME as says etfdb (used on stonk o tracker) and been able to see around 3.700.000 ftd on etfs since July just in one, that took some more of my attention, was this one:

Failure to Deliver (FTD) for VTI

| Date | FTD | Price | FTD \* \$ | T+35 Date |

\+-----+-----+-----+-----+

 \+-----+-----+-----+-----+-----+

Look the dates and how it increased, anyway need some wrinkle brains here also because i found another websites that says GME is not in the holdings at current date, seems they are sending the fuckery thru etf+options --> swaps and ISDA, this is not a financial advise, but smells like trash.

WAGMI

EDIT: Also i have to say some etfs that had gme dissapeared, got to 0.0000 and delisted, one the day 26 of august -----> GSD from wisdom tree
