Is_self: True

And I quote "History books are littered with really smart people who have lost all their money in the markets, so when your in an investment & it's not working you really need to take a step back, "what don't I understand in this situation." If you really think you resolve all the unknowns that you can possibly get your head around YOU STAY WITH YOUR POISITION"

If Ken's in I'm in!! I won't get out until Ken does. Hell I might even stick around after.

RAB I'm not good with puzzles but I'm good with facts and data to back it up. Just wanted to personally say thanks to you and all the folks here.

For verification of the above insight. Thanks Ken!!

Please forward to 7:55 of the interview
