## TESLA GOASS SPLIT

- Credit to Sam and Samgungraven for verifying the data

1. Tesla 52-week low at two weeks prior to split/ dividend: **\$ 350**
2. Upon announcement of split-via-dividend, Tesla closed at: **\$ 500**
3. At the time of the shareholder split vote, Tesla was trading at: **\$ 1,450**
4. On the date of record for receipt of the dividend the price was: **\$ 2,050**
5. On the date of the dividend, coming 10 days later, the price was: **\$ 2,210**
6. After the stock underwent the voted-upon 5-for-1 split, we obtain: **\$ 442**
7. Shorts covered throughout this entire split process. Tesla rose to: **\$ 1,243**
8. Adjusting for the price prior to the split, we multiply by 5, to obtain: **\$ 6,217**

*Because of the Split via Dividend, Tesla stock price increased by **1,776.11 %** (from the **\$ 350** low-near-announcement-pre-split to **\$ 6,217.45**) in an acute timeframe. TSLA was less-shorted than GME is.*

## GameStop MOASS SPLIT

- Very soon we will be able to update this list for GameStop

1. GameStop 52-week low two weeks prior to announcement: **\$ 75**
2. On announcement of split-via-dividend, GameStop closed at: **\$ 165**
3. At the time of the shareholder split vote, GameStop traded at: **\$ \_\_\_\_\_**
4. On the date of record for receipt of the dividend the price was: **\$ \_\_\_\_\_**
5. On the date of the dividend, coming 10 days later, the price was: **\$ \_\_\_\_\_**
6. After the stock underwent the voted-upon \_-for-1 split, we obtain: **\$ \_\_\_\_\_**
7. Shorts covered throughout the entire process. GameStop rose to: **\$ \_\_\_\_\_**
8. Adjusting for the price prior to the split, we multiply by \_ to obtain: **\$ \_\_\_\_\_**

*Because of the Split via Dividend, GameStop stock price increased by \_\_\_\_\_% (from the **\$ 75** low-near-announcement-pre-split to **\$ \_\_\_\_\_**) in an acute timeframe.*
