Sup apes?

Having a blast buying and holding? Great, me too.

****TLDR:****

****Kenny Boy is doing some weird shit with a company called StoneCo and increased it Holdings in StoneCo in Q1/2021 by 2281%.****

****Other 3 main holders are Tiger Global, Warren Buffet and Cathie Wood.****

****Please alert the Ape-Team to dig deeper into this since I am a smooth brain and just stumbled about this by accident.****

Sorry for all the typos and the unorganized structure. I am at work but wanted to get this out quickly.

I was just browsing r/superstonk and saw a heat map of the market. My smooth brain was like "lol, a lot of red", then I learned about some Spanish village that flags looks basically like the heat map today:

Please insert they are the same picture meme

Shoutout to ****u/**[**No_Guava_9842**]**(https://www.reddit.com/user/No_Guava_9842/) for improving my knowledge about spanish villages. This is not what I found but just an exhibit of how smooth I am - so you can better prepare for what you are dealing with.

Then I looked at some more heat maps because I like to see a lot of red. Dont judge me.

After watching the US market I browsed through several functions and found a thing called "World Heat Map". My brain was like "mhm lets try it"..

[Did not know this function before today - nuf said](https://preview.redd.it/rlwz6c0geyh71.png?width=1419&format=png&auto=webp&s=910a7a69abbb857b05d351d68f5f5533f530f859)

A lot of red huh?

Well why are the little Caribbean Islands so hugely represented? Weird isn't it? Even taking tax fraud into account.

So I clicked through names I have never heard and ended up with a company called StoneCo (\$STNE).

StoneCo has a market cap of 15,52 Billion USD - more than our beloved stock.

Since I am very clumsy (I am only allowed to drink out of plastic cups at my mother in laws house - no joke) I am really good at stumbling over weird shit and look what that made me do:

I googled "Citadell StoneCo".

Guess who showed up? You are right, Mayo Man.

[Da fuq?](<https://preview.redd.it/0z5245m1fyh71.png?width=979&format;=png&auto;=webp&s;=e0539c3a90f996dad5b59d18c973f7d2fff2c15>)

****Kenny Body increased his position by 22,8x times. Why?****

After hitting my head against the keyboard a little bit more, I found a nice paragraph at some unserious finance blog (Yes, I am speaking to you Yahoo):

[-32% return and revenue up 35% - lol](<https://preview.redd.it/jjecxeohfyh71.png?width=694&format;=png&auto;=webp&s;=170f77af5e28b9b333008c083a89b3e6ce083e3f>)

And guess for which country StoneCo is building payment services? They country where the puts are on vacation.

And now look at the other names that are playing with StoneCo as toy:

Warren BuffetCathie WoodKen GriffinTiger Global

I honestly have now idea what all this means, but it seemed to me worth to share it with fellow apes.Maybe there are some bananas at the end of this or maybe I am just bananas - who knows.

****Edit 1:****

****First of all****, I would like to thank all apes for the great feedback for this post. Please don't give me awards, you better put this money where it belongs. *OoK OOOOk and throwing bananas*

****Secondly****, I would like to point out that there are great angles that could be pursued on this topic in the comments. I will not put them here since they are all speculation until proven with data, but they are worth to be checked out.

****Thirdly****, I want to thank our fellow ape

****u/**[**perfidiousfox**](https://www.reddit.com/user/perfidiousfox/)** for his valuable comment. He gave me his approval and I will put the comment right here to give it more visibility, but please be so nice and give this ape the karma he deserves:

" I'm not sure what this means, but Melvin capital management LP recently invested heavily in Pago seguro, a competing digital payment company.....

https://www.sec.gov/Archives/edgar/data/0001628110/000090571821000750/0000905718-21-000750-index.htm

I didn't know what this meant at the time, but it seemed odd to me. Now seeing those guys going into competing companies seems at odds, but what if one of them is actually a short position marked as long? Or the MM side is registering a lot of shares so they can naked short without as much suspicion?"

****Edit 2: Not financial advice.****
