If anyone has any wrinkles can they explain why one year ago yesterday that nextflix went from a close of 501.77 to an open the next day of 565.42 (and then closed at 586.34)? What is the most likely thing to happen to cause these jumps in the afterhours, seeing as of now Netflix is -20.22% (508.25 to 405.50 (-102.75)). Is it just options being created and expiring, or is nextflix being used as bank to save for gme
