Symptoms as follows...

Have made two purchases direct stock purchases of GME. Previously had set up an account.

When I log into account through investor center it says I am logged in, but the only option is to recover username - weirdly under the tab for confirm stock.

I have never been sent an account number. And when I try to utilize my SSN to register or contact them by phone or chat it's listed as not being found.

I have many texts messages from the purchases and purchase IDs.

When I follow up with the only option after logging in - recover user ID (which, obviously makes no sense) it gives me a browser based error page - Too Many Redirects - regardless of browser or device I utilize.

This probably isn't the best place for this post, but I have been trying to figure this out for days. I'm also in a time zone that makes it hard to get them on the phone during the weekday.

Anyone had a similar issue?
