SWIFT cut off from #Russian will likely make their bonds value fall to potentially ZERO, means collateral value fall potentially ZERO, which already triggered MarginCall 🚩 in Swiss private bank. This poised grave danger to risky assets in coming days and weeks ahead. How badly these will affect #citadel #point72 #melvincapital is yet to be seen. If UHNW (ULTRA HIGH NETWORTH) are affected it is not likely they wouldn't be affected. In financial markets EVERYTHING is interrelated and interdependent.

How badly they will be affected by these Russian asset sanctions are yet to come. My bet these SHF are going to be in trouble. They are forced to unwind all their NAKEDSHORTS on all shorted stocks especially GME. Potentially this might just be the CATALYST for massive short unwinding (SYNCHRONIZE SHORT COVERING), This is potentially "financial nuclear"! Well maybe nothing will happen because this financial market is so rigged they can make print anything out of thin air.

Since this is very common practise to leveraged on high yielder such as #RUSSIAN #rouble high grade or investment grade bonds for yield enhancements. 9 out of 10 UHNW will have this in their portfolio. With #SWIFT sanction from G7 on #Russian banks it will have grave danger on global liquidity. MarginCall 🚩 is just tip of the iceberg.

POTENTIALLY GLOBAL MARKET MELTDOWN AHEAD 🚩🚩🚩
