It seemed to me like the reverse repo has stalled a bit, so I ran the numbers in excel for the past 60 days. Here are the data with a 2-day moving average and a trendline. The trendline is extended for an extra 20 days (about a month) where it ends at \$1433B. These data exclude yesterday's value.

<https://preview.redd.it/g6itx2zzyep71.png?width=360&format;=png&auto;=webp&s;=df596cd8280de637de05102d03db802315542937>

After a few more days, we can see if the rule change that went into effect yesterday made a measurable impact.

\*Edit\*: better version of the chart:
