Hey everyone! I just wanted to let you know GME is about to blast the fuck out of this atmosphere. My last TA was pretty accurate and wanted to give you a tit jacking update! [https://www.reddit.com/r/GME/comments/tpqf1x/gme_is_headed_to_the_moon_this_week_lfg/?utm_source=share&utm_medium=web2x&context=3](https://www.reddit.com/r/GME/comments/tpqf1x/gme_is_headed_to_the_moon_this_week_lfg/?utm_source=share&utm_medium=web2x&context=3)

[Remember this?](<https://preview.redd.it/fzt6m5p586s81.png?width=543&format=png&auto=webp&s=42527dcef5b891a192b959ec10c27f5d27d34bda>)

Well we certainly were headed to the moon and they brought it back down through crime. Basically getting ready for the shit storm that is about to unfold.

Also, I want to say I love you guys. There was a jacked titty thread on the last TA that is literally probably one of the funniest things I have ever seen [https://www.reddit.com/r/GME/comments/tpqf1x/comment/i2cqi9c/?utm_source=share&utm_medium=web2x&context=3](https://www.reddit.com/r/GME/comments/tpqf1x/comment/i2cqi9c/?utm_source=share&utm_medium=web2x&context=3)

Hopefully these charts I colored on will jack you up more then you already are.

[This is the 1 week chart.](<https://preview.redd.it/8wos7ni096s81.png?width=1140&format=png&auto=webp&s=2e172a4ce470be60adfaa5164eac57daf10c92d>)

One of the most important indicator I would like to point out is the purple circle. This is the Parabolic Sars indicator. It has flipped for the first time since 1/25/21.

The MACD (pink arrow) is still going up into positive territory. Green histograms still, very bullish.

Stoch (blue) is still headed up

Aroon (orange) is positive and neautral

Overall - Id say this week is consolidation from going 89 ->199 in a week. Closing at 150 today is very good. I think the next move is going to be explosive up

[This is the 1 day](<https://preview.redd.it/a7mixub1b6s81.png?width=1110&format=png&auto=webp&s=cb19fb659f957488642d48466678493defe4afac>)

The purple circle is what I would like to point out. I tried to draw a dorito shape to show you. GME is at a critical junction.

Looks like consolidation could be over. If it is, It could go 200+ tomorrow and next monday and tuesday is

going to be a shit show

Or i can be wrong and it dips more.

The 1 week looks super bullish and I think we see a big day tomorrow.

Overall - tomorrow is a big day, it can go into the downward descending channel more. Or it can break out to 200+

TLDR: I think this week was consolidation for the the shit storm that is about to happen

TARD: Moon soon!
