

Title: So I found this crypto wallet that has a strong correlation of dumping before/during GME & Movie stock price dumps/declines. Even when crypto was on a tear, it dumped.

Automod Nuked my post update on my last post. So here we are again! I will be slowly updating this post over the next hour with hyperlinks to try to avoid getting autonuked again so bare with me.

Save your rewards you kind apes!! And thanks for the previous ones!

Lots to add, so I restructured the previous post. If you have any DD or good info to add, DM me or comment and I will add it to the post. If I forgot to credit you or you want credit, reach out to me! Not trying to steal anyone's thunder!

I briefly looked into the timing of these dumps with the price suppression of GME and others, even when crypto was on a tear to 60k, they dumped a massive amount of coins right on JAN 27TH! We need more wrinkles on this with time to skim over it.

The cherry on top, they literally dumped coins right before the recent coin crash. Huh..., maybe its the real "REAL NOSTRADAMUS" ■?

Wallet ID:

3JZq4atUahhuA9rLhXLMhhTo133J9rF97j

(Google it, every time I post a link automod nuked me)

Look at the timing of the crypto dumps and GME price suppression, very suspect stuff.

***Crypto Exchanges**

_ I'm being told this wallet has direct correlation with BitFinex - Something relating to this also here in a 2 yr old post.

_ They call it Bitfinex's 'cold wallet'

_ Linking a comment on my OP regarding a link between **A Big Chinese Real Estate Company** and **T3thr** by a smart ape.

More on T3thr and the liquidity crisis it may soon have.

#**Shower Thoughts**

_ Some constructive comments from my OP.
[HERE](http://imgur.com/gallery/nKoZXCh)

_ It will be time consuming. But I would try to find a link to KEN G's tarmac meetings in Paris / Cayman Islands. That would be HUGE if one existed.

_ There has also been some concerns about BNB token, and btfinx LEO token(yes, bitfinex owns that too), and how it somehow scathed by the recent crypto dump. And actually made gains!

_ This could be nothing, could be something. Need time to draw some conclusions. Yeah there's a lot of speculation here but that's where it all starts.

_ There's thoughts that this wallet may just be a wallet that provides liquidity to Bitfinex's Exchange. The correlation between the price dumps semi-debunks that, or, may reinforce it, due to the fact that Bitfinex is transferring crypto to other wallets where liquidity is needed because those wallets are the ones linked to doing the dirty work against GME by someone else.

_ Maybe the crutch that SHF's are leaning on is crypto. Maybe if **A large Chinese Real Estate Company** fails, T3thr fails, and crypto dumps along with SHF's ability to short the stonk? Black Swan anyone?

I'm speaking freely and speculatively here, but I think Someone or a Group of Someone's(possibly the exhnages themselves working together with Someones), are using crypto in ways we may not understand yet, as a means to short the stonk(or group of stonks). Apes need to dig into this rabbit hole further untill we come to a dead end.
