Computer scientists have apparently uncovered a covert server linking the Trump Organization to a Russian-based bank.

Statement from Jake Sullivan on New Report Exposing Trump's Secret Line of Communication to Russia

In response to a new report from *State* alleging that the Trump Organization has a secret server registered in Trump Tower that has been secretly communicating with Russia, *Hillary for America* Senior Policy Advisor Jake Sullivan released the following statement Monday:

"This could be the most direct link yet between Donald Trump and Moscow. Computer scientists have apparently uncovered a covert server linking the Trump Organization to a Russian-based bank."

"This secret hotline may be the key to unlocking the mystery of Trump's ties to Russia. It certainly seems the Trump Organization felt it had something to hide, given that it apparently took steps to conceal the link when it was discovered by journalists."

"This line of communication may help explain Trump's bizarre adoration of Vladimir Putin and endorsement of so many pro-Kremlin positions throughout this campaign. It raises even more troubling questions in light of Russia's longstanding efforts to hack into our election systems. We can only assume that behind-the-scenes efforts will now explore this direct connection between Trump and Russia as part of their ongoing probe into Russia's meddling in our elections."

You are absolutely correct. That tweet is a Clinton campaign hoax for which their campaign lawyer is undergoing a criminal trial.
