General Introduction

*** (Shout out to TomatoeHaven who helped with this DD, HorrorCarob and every other ape that contributed. I love you all.) ***

Hello again my fellow Apes. Guess who's back? No, it's not Slim Shady even though that would be way better. It's not Kenny fuckface. Who knows where the fuck that guy is. As a matter of fact, where is he? Hmm...

Anyway, it's neither Slim nor Kenny dipshit but rather your very own retard, Nova, responsible for creating DD's like, (**The AMC Squeeze Will Surpass Older Brother GME - Long DD for every kind of Retard - In Depth Technical Analysis - Not Financial Advice; Financial Observation at best.**), [(https://www.reddit.com/r/amcstock/comments/mcly9e/the_amc_squeeze_will_surpass_older_brother_gme/)(**A Mask off Citadel; Great Men Embezzle (AMC; GME)**), [(https://www.reddit.com/r/Wallstreetbetsnew/comments/ms7cik/a_mask_off_citadel_great_men_embezzle_amc_gme/)(**American Market Collapses; Greedy Men End (AMC; GME) - Cutting off Ken's Support Line**)] and my personal favorite[(https://www.reddit.com/r/DeeFuckingValue/comments/mw9iya/american_market_collapses_greedy_men_end_amc_gme/), (**Master Level God Tier DD - Facts Only + New Strategies for Apes**)] <- I am still talking to Apes about this one that I posted over 2 months ago and I'm so proud to say that an ass ton of Apes have learned how to trade call options very successfully amidst the squeeze. Respect to all of you for your courage in expanding your knowledge in an extremely corrupted market. You all did that, I didn't do much at all, I'm just a retard I promise so in reading this please take everything I say with a fine ass grain of salt. [(https://www.reddit.com/r/amcstock/comments/mpsksw/master_level_god_tier_dd_facts_only_new/)

TLDR: Go fuck yourself. Read. Go down there and read. You want to know if the squeeze already started? Then save this shit for later if you're busy, and then, when you're free go down there, fucking read. This DD is intended for Apes who give a flying fuck about what's going on and even the smoothest apes read nowadays so no excuse =0

TLDR For The Synthetic Apes: Bye. Hodl and keep it pushing.

Part I - DD Intro (The Shady Pool)

Now it's been widely discussed and well known that there exist 2 different worlds of our exchange market. Both worlds are identical but one is bullshit and the other one is less bullshit. Yes, I'm talking about the ominous Dark Pool. The part of the market that we aren't allowed to see so that institutional investors have an advantage over pretty much all of us. Now that's not to say Dark Pools are the biggest threat to retail investors. Dark Pools have been overhyped a bit, such as when Michele Schneider went on Fox News and said all kinds of craziness about it. In my opinion I agree with Dave Lauer's take on it where the focus

should be more on the SRO model which basically allows them to self-regulate. Dark Pools don't display quotes. So we can't see what's happening but Dark pool trades are all publicly reported within 10 seconds. However, the power that lies in the Dark Pool is in what can be hidden as far as the price goes.

And some of you are probably thinking, "damn, here goes another tin foil nut job talking about the real price vs fake price with no proof to provide for his or her little conspiracy theory". Well, you're right that I'm a nut job. That's on the money. But my logic here is this, feel free to disagree, as again I am retarded and now also a known nut job; when engaging in manipulation of any kind or trying to accomplish any task ever, applied to every concept in the world, is it the point to find the most complicated way to do it and make accomplishing the task incredibly difficult? Or is the point to find the most efficient way to accomplish the task?

Part II - Made You Look & Now Your Ankles Broke

I will refer to the practice of Magicians. And no, I'm not a magician. I'm a fucking wizard. Magicians often hide their illusion in plain sight. The whole idea is to make the actual trick really fucking obvious, almost too fucking obvious while shifting around and mind fucking you by getting you to look in all the wrong places. If you know me, you know I study Psychology.

I am currently creating a YouTube video with a lot of cursing and mildly funny bullshit in hopes of educating Apes on Trading Psychology. But as of now, in regards to the squeeze that shit doesn't matter at all because you apes are super saiyan levels of retarded that the world has never seen. IQ's in the negatives. So no amount of logic can dissuade you beautiful fucks. At least the majority of you. Some of you that aren't the kinds of Apes that know absolutely to hodl and only take profits on the way down after we've hit the ceiling of 20 Million a share minimum for GME and 500k minimum for AMC aren't verified retards. So you all need to learn about Trading Psychology IMMEDIATELY.

Get off my DD and look into the manipulation of retail investors. Or don't. You only risk leaving millions of profit on the table but hey who cares about money, am I right?

Part III - The Shady Pool Is Back

Anyway, the Dark Pool.

Let's say you controlled just about fucking everything in the market. The Dark Pool was yours to manipulate with the help of other scumbags that can't afford to lose their clients money, you were the market makers, the regulators, the politicians and not the small time ones either, I'm talking the big ones you'll see on the news soon enough, what would you do? How would you manipulate the stock market if the Squeeze of all the fucking Squeezes was about to happen and you were about to lose TRILLIONS OF DOLLARS amongst you and all your fuckboys? Your company was going to tank and your clients were going to hunt you down and put your head on a wall, if the government doesn't catch you first. Seriously where the fuck is Kenny no titty? I hope he didn't kill himself. He better have not. He's got charges to face and a lot of questions to answer.

Anyway, the Dark Pool.

Do you go about manipulating it in the most complicated way possible? I mean sure you've got an Algo doing most of the work anyway, and it's doing things faster than anyone can even comprehend. Anyone except for our Apes who cracked the shorting algorithm -> **[**I think I figured out the shorting algorithm** \- geniuses and retards working hand in hand. I FUCKING LOVE IT. MA TITS.**

](https://www.reddit.com/r/Superstonk/comments/ogjkao/i_think_i_figured_out_the_shorting_algorithm/)

Anyway, the Pool Dark.

So, as a magician this is what I would do. I don't know about you but what I would do, is move a bunch of

shit everywhere else while I've also got my Algo running a bunch of shit and keeping the "price" we all see logical and believable to rest of us, the dumb fucks that we are, and all the while the only thing I'm really manipulating is the price you see. I would bring in all of my peoples working around Andrewmomoney and by that I mean silicon valley, and I would mask the shit out of that price for as long as I fucking could. GME trading at \$191.30 right now with all of the buying and holding? AMC at \$46.23? I am calling all of the bullshit.

Part III - The OBV because its fucking obvious

The "On Balance Volume (OBV)" is a technical indicator that uses volume changes to make price predictions. The indication is based on real data that has already happened which means unlike all the other bullshit, it can't be manipulated. It's literal purpose is to show how the price is moving. So in retard speak, if the price go and close higher than the previous closing price then the OBV goes up and if the opposite happens then OBV goes down because logic.

Fack check ma ass. Go check the OBV of GME and AMC. Go ahead. I'll fucking wait. I'm a patient ass retard. Go check that shit and compare that shit to January OBV. Check the total FTD's that accumulated since and even the options chain that will expire on July 16th. Because I damn well bet you that the total amount of options that expire on the 16th for GME are close to equal the total float. Explain that shit! Please! Try to explain that shit! Is $1 + 1$ still 2?

Better yet. Go check this DD out -> [The ***real price*** of GME is currently around 900-1k RIGHT NOW BASED ON OBV](https://www.reddit.com/r/Superstonk/comments/mp1sgt/the_real_price_of_gme_is_currently_around_9001k/)

Look at those beautiful graphs this beautiful ape put together. The OBV for GME looks like Picasso designed that shit. The OBV during January, specifically when the price was \$482 was around **356.22 million**. 2 months ago the OBV of GME was roughly **730.11 million**. So if you did the most basic of basic rough estimates using these numbers based on percentage proportions, then the real price for GME should've been about \$1,000 2 months ago. But now what would it be? Now? Go ahead. Do the math. I won't even do it for you. Ya'll do the math. My retarded ass can't do math.

The OBV is significantly more than the OBV in January's peak. sIgnIFcanTLy MORE.

\-----

Intermission - Enjoy some pictures =P

[This picture is showcasing the short interest increasing for all meme stocks](<https://preview.redd.it/ishgbe31vka71.png?width=1750&format;=png&auto;=webp&s;=65a849be0222cde878fb13d7b7b3f2678f9cbfaf>)

[This picture clearly displays the way they move in a similar manner. If they could hide this, would they?](<https://preview.redd.it/yjixa456vka71.png?width=980&format;=png&auto;=webp&s;=4bac690ce70b5de3229586387b22cb6eb5bf3763>)

[E- Trade](<https://preview.redd.it/n2rfhpzdvka71.png?width=888&format;=png&auto;=webp&s;=a2aa8e114f98c126cbfa67f10704273fd3b0919f>)

[Compare this one with the Photo Below](https://preview.redd.it/h0wjw55ovka71.png?width=2026&format;=png&auto;=webp&s;=3229c62a8337691e1df18bfb9c55bd1e5349ffe8)

[If you compared successfully you'll have noticed that AMC has the HIGHEST holdings of shares by at least double in notional value if not 10 fucking times the amount of shares it should contain](https://preview.redd.it/tjav4ztsvka71.jpg?width=2604&format;=jpg&auto;=webp&s;=50d6a3a8ed611f5f684a9098237cbb625ebecbb4)

Problem A

So that brings us to problem A or as I would like to refer to it, the Houdini problem. Now, lying to traders about the value of a stock is already pretty fucking nuts. Lying to the entire fucking world? FUCKING NEXT LEVEL MAGIC! This is straight wizard shit, he who shall not be named type of fuckery. Because the lie isn't just to us apes. It's to everyone whose watching this debacle on the news and there are A FUCK TON of people watching this shit. I have family in retirement homes calling me like what's going on with GME and AMC? My little 12 year old cousins are asking me about this shit. So it's safe to say at this point, most of the world is watching. That would make this, the greatest fucking illusion of all time. But does that mean it can't be done?

Fuck no. You can lie to the world EASY BRO. Easy. Just look at the Pandemic. Okay let me stop. But the point is, just look into magicians. The shit they have pulled off with audiences and cameras and other magicians looking dead at them, is ridiculous. We can all be fooled and that's the secret ingredient. We doubt that shit. We're like, "no way bruh, they can't lie to all of us and show us some bullshit number on all of our devices? The news? The government? They can't possibly just make up a number. What about technical analysis? What about the synthetics? What about the other stuff?

It's all a show.

So now what? If the Squeeze has possibly already started then how the fuck are we ever going to know? When are we ever going to see the real number? Should've seen it last week I think. FTD were overdue overdue I think. So when then? Today? Monday market open? This week? Next week? When will we see the fucking squeeze? And how can we see the fucking squeeze? Can we depend on the integrity of the market?

hmmm.....

uhhh.....

yeah.....

No. no. That's not a thing. So then what?

Well, let's go back to the housing market crash of 2008 as the best indicator of the future is the past. Usually. See what I did there? Because of the OBV? Ah, forget it.

So when the shit hit the fan the thing that happened that no one could believe happened was that every fucking criminal involved got bailed the fuck out with little to no consequences. They made deals. They shook hands behind the scenes. They said, I'll cover your ass because your ass is connected to my ass and I don't want to go down for your bullshit. I want to live to fuck another day and I want you to owe me because favors are everything when it comes to power. So one option could be this. The criminals all get bailed out yet the fuck again. Given, riots may start and who knows what the fuck else but this is a real possibility. In my humble retarded opinion it would even explain why shit didn't pop off last week or the week before. Negotiations take time motherfucker! Remember how long it took for us to get our stimulus

checks? This is way bigger than that. Way fucking bigger than that. And what would this look like?

This would look like a CONTROLLED SQUEEZE. And I'm fucking saying that, not to scare the shit out of any Apes but to let you know what my dumb ass thinks so we can consider all the fucking possibilities and be prepared for whatever go down. I don't want any apes being blindsided by these pieces of shit.

\-----

Long Ass Recap

SO TO BE AS CLEAR as the most beautiful Crystal in the world, they have not covered shit. Not in the exchange market we can all see, not in the dark pool, not in a black bears asshole, nowhere, did they cover any fucking thing.

[Looks like the recent RobinHood Class Action SI Report just proved /u/broccaaa's data. That the shorts haven't covered, that they hid SI% through Deep ITM CALLs, and SI% is a minimum of 226.42%.](https://www.reddit.com/r/Superstonk/comments/o7klxj/looks_like_the_recent_robinhood_class_action_si/)

DD's are coming out about this. YouTubers are talking about this. You know what the fuck is up. So, what does this mean for Monday?

You got 2 fucking options. That's it. Just 2. 1 + 1. That's it. There's no other options. It's either, at this point, with the media attention and the apes talking about this shit ALL OVER, that they feign ignorance and call the whole shebang a technical error and we see the real fucking price for the first time this week or...we know these motherfuckers made THE DEAL. The reason being for this is due to all of the regulations that are currently in place and in effect along with the amount of calls that have expired in the money. They owe so much that regardless of any Algo shorting, they should have been margin called or forced to cover. Neither of these happened.

The deal would protect them in stalling. At least temporarily.

THE DEAL is simple. The squeeze will still happen. But...they are prepared to go up against every fucking retail investor invested in this shit. If they can't stop the squeeze, they will manage the squeeze so we don't get to the ceiling we know we should. And how can this happen? By forgiving the FTD's. Fuck it. They don't have to cover. They'll let this shit go. We won't. If this happens then they're betting that Apes will take the bit of profit they make and move on but APES AIN'T MOVING THE FUCK ON. Oh hell to the fuck no. Some investors will move on. But those were never real apes to begin with. Those were some nice people who rented out ape outfits to make a little money and go about their lives. But real fucking apes? Diamond handed apes? The elitist of elite. Tried and true, our blood is the shit that's used to make crayons, these kinds of APES ARE NOT GOING ANY FUCKING WHERE.

Letting them cut this deal means letting them get away with it. It gives them an out. A way to save some face and throw us a bone for fighting back for the first time. Kind of like a bribe. They're bribing us. And do you want to know why? Because in their minds every one has a price and you poor fucks will take whatever you can get and move on and fall back in line. I can only speak for myself as an individual retail investor but to that I say go fuck yourself. My price is justice, pay it or I'll come for it myself. I think Apes will feel the same given the bullshit they've done but...

That's just my 2 cents. 1 cent + 1 cent. I'm a dumbass ape but I'm fucking holding and I'm buying more. And I'm suing everybody if they don't have to cover. I don't give a fuck anymore. My fucks disappeared in January. Now as always, this is not financial advice and I'm not suggesting anybody go on the streets and start rioting like some psychotic apes. All I'm saying is we need to be paying the most attention we ever have and we need to consider every fucking possibility. Continue to learn and read your DD's.

Don't get lazy. Don't just read the TLDR's. Save the DD and then when you go to the bathroom to take a massive ape shit, whip out your phone and read these things. Make a comment. Call someone out on their bullshit. Provide support if you can. Spread these fucking things like wildfire. You know someone who works at BuzzFeed? Send them this filth. Send them every fucking DD that makes even a lick of fucking sense.

So I'll wrap things up here because my DD's are usually long as fuck and I know apes will bitch about it. You guys have lives and I love you all so I will now kindly shut the fuck up, and try to enjoy my weekend before whatever crazy shit comes this week.

Prepare yourselves for whatever. Don't set dates. Don't get caught up in FUD. Don't fear the system, make the system fear you. Deals can be made and deals can be broken. But as I said many times, I am the most retarded ape you will ever know so, take that for what it is.

See you on the moon you sexy motherfuckers.

Mic drop on foot.

Ow.
