So I made my new gamestop wallet and now want to add the funds to it. I tried adding funds using add funds button and using debit/credit card option, but the wyre and ramp services in there are pretty expensive and require a minimum of 100\$ deposited. I want to add \$10 only to the wallet while I get a feel for how things work.

Based on just looking around the app and the web one can transfer ETH from another wallet or an exchange. Seems like gemini allows a small amount of transfers free per month and so does the FTX app.

I don't have any crypto brokerage accounts on any of these apps or anywhere else - is there a cheaper way to do this without opening up a new account at a crypto broker?

If however there is no other way then would appreciate what crypto broker/exchange is recommended.
