Infinity pool/CS shares (forever shares)

Lately I've been seeing a lot of apes trying to put sell orders to test CS sells or saying they'll sell their CS shares during MOASS and I know I can't tell you what to do with your shares but I think you should reconsider and remember

the infinity pool (CS Shares) are meant for shares you are keeping forever. You should keep shares in your brokerage account you are planning on selling during MOASS. if you sell from CS you hurt MOASS because when you sell from CS You are selling a real share back to the SHF and that means they can sell the real shares they've obtain back and forth to each other to close their phantom shares possibly affecting price and how long MOASS last while not worrying about getting them form apes still holding on DTC (stock market) because they've obtained a real share. But if we Hold CS (infinity pool) and only sell from what we left in our brokerage account then when the Float get locked up , SHF will be forced to close their phantom shares because that's all that will remain on the DTC. Transfer only what you are planning on keeping forever to CS & what ever you'll sell during MOASS in your brokerage account that way SHF's have to buy back their phantom shares = extending MOASS. ■■■■■■

P.S I'd love to get some wrinkles on this & a possible DD. Just want to clarify that I am not saying that it's bad to transfer to CS I'm saying it hurts MOASS if you sell shares from CS (infinity pool) during MOASS instead sell from shares you still have in your brokerage account to force SHF's to buy back their phantom shares.
